* Acceptable means that the products have been reviewed according to the requirements of 10NYCRR Appendix 75-A and any reductions allowed for products are in accordance with the November 24, 2004 NYSDOH Interoffice Memorandum titled "Onsite Wastewater Treatment Systems: Specific Waiver Criteria - Gravelless Systems and Secondary Treatment Units (STUs)". The above list is not an endorsement of any of the products by the NYS Department of Health.

** Until the Appendix 75-A revisions are adopted, the trench length reduction will require the issuance of a Specific Waiver or plan approval from the local health department having jurisdiction. LF = linear feet.
