Poughkeepsie-Dutchess County Transportation Council

Annual Listing of Obligated Projects-Federal Fiscal Year (FFY) 2009

Purpose

The Transportation Improvement Program (TIP) is a five year listing of transportation projects that will be wholly or partially paid for with money from the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA). The current 2008-2012 TIP was approved in October 2007 and covers Federal Fiscal Years (FFY) 2008 through 2012.

The TIP lists the intended schedule and estimated cost for each phase of a transportation project. Project schedules and costs change on a daily basis, usually as the result of personnel, consultant, or resource availability, and the refinement of a project's scope as it is advanced; thus, the TIP, though updated to reflect current project schedules and costs prior to obligating phases, does not at any one point in time provide accounting-level precision of actual, current project level costs and schedules - except when the TIP is first approved

Therefore, to ensure that the public has an accurate understanding of how federal funds are actually spent on transportation projects, Congress included in the [Safe, Accountable, Flexible, Efficient Transportation Equity Act \(SAFETEA\)](#) a requirement that the organizations responsible for approving the TIP publish an annual listing of project obligations.

What are project obligations?

You might think of this as setting up a checking account for a purchase and then making an initial deposit. In order to begin work on any phase of a transportation project, federal funds must be obligated. This means that money is set aside for that particular project (deposited in the "checking account" for the project), which can then be used to pay bills. The project expenses may be bills from a design consultant, a construction contractor, or payroll costs for agency employees working on the project.

Do project obligations mean the work is underway?

Not always. Project obligations are made to allow a project phase to begin, but it takes time to get work underway once the phase is obligated. For example, once the construction phase is obligated, the project can then be advertised for bids. The advertisement period can vary depending on the size and complexity of the project (up to five weeks in some cases). Bids are then opened and verified and the project awarded to a contractor. This process can create a three to four month lag between initial obligation and noticeable work performed by the contractor at the site.

There are instances when a project phase is obligated, but work is never started or not completed in a timely manner; these are generally due to competing priorities with the project sponsor. If there is a question on the status of a specific project, the project sponsor should be contacted.

Project Listing

The following table lists projects that had Federal funds obligated during FFY 2009 (October 1, 2008 – September 30, 2009) and identifies the phases for which those funds were obligated. The table is split into two parts: FHWA funded projects and FTA funded projects.

Poughkeepsie-Dutchess County Transportation Council

Annual Listing of Obligated Projects-Federal Fiscal Year (FFY) 2009

The table includes basic data about each project:

- PIN (Project Identification Number): Used by agencies to identify each project for which it is responsible.
- Project Description: A brief outline of the project, generally limited to the project type, scope, and major features. More detailed information on these projects can be found in the [2008-2012 Transportation Improvement Program \(TIP\)](#).
- Project Sponsor: The agency responsible for proposing and completing the project.
- Total Federal Project Cost: This is the total amount of Federal funds budgeted for the project (in millions of dollars). It does not include non-federal funds (e.g. State or local funds).
- Federal Funds Programmed on 2008-2012 TIP: Federal funds on the 2008-2012 TIP. Some projects span more than one TIP or may have funding on a prior or upcoming TIP to complete the project.
- Project Phases Obligated in FFY 2009: These are the phases for which funding was obligated. Only those phases that had funds obligated during the FFY are listed. Any transportation project, large or small, begins with an idea or plan and ends with construction and/or a purchase of equipment or a service. Below are phases mentioned in this listing:
 - Preliminary Design: Basic engineering on each alternative, traffic studies, environmental analyses, and other work specific to the project is completed. Public outreach is used to gain community input into project design. This phase ends with the selection and approval of a project alternative.
 - Detailed Design: The actual plans and specifications that the construction contractor will use are created.
 - Right of Way Incidentals: Work done to prepare for the acquisition of the right-of-way.
 - Right of Way Acquisition: Right-of-way necessary for the completion of a project, either through purchase or easements.
 - Construction: All of the work to build the project, whether by a contractor or agency.
 - Construction Inspection: In order to make sure that construction is being done properly and conforms to specifications, there is ongoing inspection. Sometimes this work is done by NYSDOT or the Dutchess County Department of Public Works, but it is often contracted out.

Poughkeepsie-Dutchess County Transportation Council

Annual Listing of Obligated Projects-Federal Fiscal Year (FFY) 2009

- **Miscellaneous:** Usually associated with transit projects, this may involve the purchase and acquisition of rolling stock and associated equipment. In some cases, it covers the construction of fixed or permanent facilities such as a station, parking, or maintenance/storage facility.

- **Federal funds obligated in FFY 2009:** Federal funds (in millions of dollars) obligated in the FFY.

- **Federal funds remaining on 2008-2012 TIP:** Balance of Federal funds (in millions of dollars) in FFY 2008-2012.

The list of FTA funded projects does not identify individual phases as shown for FHWA funded projects; this is because most transit agencies use funds to purchase capital equipment and do not use the funds to build infrastructure projects as done with the highway program. Instead, the table lists the grants which were awarded and obligated during FFY 2009.
